

## The "unbeliever" Now Believes

As a nurse of many - too many to mention - years I have never considered Chiropractor treatment as a 1st choice of care  
Until :-

My son had complained of chest wall pain, GP unable to determine cause & therefore no appropriate treatment. He attended ~~A friend~~ this clinic and the result has been very positive.

Me - I have had long

term arm, hand, shoulder, neck, thoracic & lumbar spine discomfort. Most I've lived with as "nurses" pains & "maternal" pains. My hand became progressively painful etc. So..... my son suggested I attend ~~at~~ for Chiropractic treatment.

I was very sceptical at first - "the non believer" - But thank you Miles, the change already is awesome and the best is yet to come.

"Now a believer"

PS Thank you Beck - fab personality
